

Down To Earth Solutions

Geoturf[®] WINDSCREEN[™]

PREFABRICATED TREE PROTECTION

Michigan winters can be tough on many landscape trees and shrubs. Broadleaf evergreens are particularly susceptible to drying out during these months. Leaves and needles lose water through transpiration and when frozen ground cuts off the water supply, leaves begin to desiccate and turn brown. Desiccation can be greatly reduced by erecting burlap windbreaks to help prevent winter injury.

WE MADE TREE PROTECTION EASIER!

We know how time consuming and labor-intensive winter preparations can be, so we created a windscreen to help solve the problem.

Manufactured from a 7 oz. untreated burlap with 1-1/8" x 1-1/8" 42" stakes and lath pre-attached, it just doesn't get much easier than that!

Windscreen Size: 36" x 25'

Protects against deer damage too!
